# Generalized Forest Cover Ownership Layer 2024

## Purpose

The Generalized Forest Cover Ownership Layer is intended to support timber supply review (TSR) analysis and high level resource management planning. The layer **SHOULD NOT** be used for operational level analysis.

### Schedule Definitions –

Schedule is used in conjunction with Ownership code to determine land that contributes to the Timber Harvesting Land Base.

| | |
|---|---|
| **Schedule A** | Private lands and Timber Licences apart the an established TFL (Tree Farm Licence), CFA (Community Forest Agreement), WL (Woodlot Licence) or FNWL (First Nations Woodland Licence) |
| **Schedule B** | Crown land not subjected to Timber Licences within the boundaries of a TFL (Tree Farm Licence), CFA (Community Forest Agreement), WL (Woodlot Licence) or FNWL (First Nations Woodland Licence) |
| **Schedule C** | Land to be included in THLB<br>(i.e. Land available for long-term integrated resource management) |
| **Schedule N** | Land to be excluded from THLB<br>(i.e. Land NOT available for long-term integrated resource management) |
| **Schedule U** | Land that may or may not be included in THLB<br>(i.e. Unknown if land is available for long-term integrated resource management) |

The Ownership and Schedule Code definitions have been updated in order to better assist Timber Supply Analysts in performing their primary duties. These changes were performed in consultation with the Forest Analysis and Inventory Branch of the Office of the Chief Forrester. The changes are effective on any downloads of the F_OWN dataset as of May, 2017.

Note: For a detailed description of data sources and data queries see the F_Own_Layer_Priority_and_Data_Sources.xlsx document

## Layer Priority Order –

The F_own dataset combines input data from several data sources which often have areas that overlap. A single ownership code is assigned for any given area. In order to decide which code is assigned to areas where data sources overlap, a rank was given to each data source layer. The rank of each data sources can be found in the F_Own_Layer_Priority_and_Data_Sources.xlsx document in the layer priority

order column. For any given location, the assigned ownership code is the highest ranked data source.

# Updated Data Sources

## Updated Data Sources in 2024

| Own Code | Schedule | Descriptor | Updated Data source | Updated Query (where clause) |
|---|---|---|---|---|
| 40 | N | Private | **WHSE_CADASTRE.PMBC_PARCEL_FABRIC_POLY_SVW** | OWNER_TYPE in ('PRIVATE', 'MIXED OWNERSHIP','FIRST NATIONS') |
| 54 | N | Federal Parcels | **WHSE_CADASTRE.PMBC_PARCEL_FABRIC_POLY_SVW** | OWNER_TYPE in ‘FEDERAL’) |
| 62 | C | Crown - Forest Management Unit | **WHSE_CADASTRE.PMBC_PARCEL_FABRIC_POLY_SVW** | OWNER_TYPE in ('CROWN PROVINCIAL', 'CROWN AGENCY','UNTITLED PROVINCIAL') |
| 80 | N | Municipal Parcels | **WHSE_CADASTRE.PMBC_PARCEL_FABRIC_POLY_SVW** | OWNER_TYPE in ('MUNICIPAL’, 'LOCAL GOVERNMENT’) |
| 91 | U | Unknown Ownership | **WHSE_CADASTRE.PMBC_PARCEL_FABRIC_POLY_SVW** | OWNER_TYPE in (‘UNCLASSIFIED’) or OWNER_TYPE is NULL |

*Note The Integrated Cadastre Fabric data source (i.e. WHSE_CADASTRE.CBM_INTGD_CADASTRAL_FABRIC_SVW) has been replaced by Parcel Map BC as the main input for cadastre (i.e. parcel) for the dataset in 2024. The WHSE_CADASTRE.CBM_INTGD_CADASTRAL_FABRIC_SVW dataset is now retired.
